Pegasystems

Cambridge, MA
Solutions Consultant

October 2017 - Present

After leading thorough discovery and requirement-gathering sessions with clients, I recommend courses of action and build proof of concept Pega implementations to solve the problems at hand. As of 2019 I was promoted to be the lead consultant on the highest earning account on the manufacturing vertical, Cisco. Currently we have over 50 Pega applications in production with another 8 in development/planning phases with roughly \$7MM in recurring annual revenue.

Verve

Carlsbad, CA
Lead Solutions Software Engineer
Innovations Software Engineer
Operations Software Engineer

October 2014 - October 2017

Designed and developed a totally custom full-stack order management portal for a premier account that has handled over \$40MM in gross revenue to date. Tech Expertise: Ruby & Rails, Python & Django, Javascript in a number of different libraries (both front and back ends), Elasticsearch query design and optimization, along with GoLang in a microservices architecture. AWS, Datadog, and NewRelic were important every day tools in order to keep optimizing my applications.

SprinkleBit, Inc.

San Diego, CA
Software Engineer

November 2013 - August 2014

I designed and developed intuitive interfaces in HTML, CSS, JS, and PHP in a SymfonyV2 Environment for online derivative trading, in addition to generating content and marketing strategies for our social network. Left due to lack of funding.

Search Optics, LLC

San Diego, CA/Detroit, MI
Visual Designer/Developer

July 2012 - August 2013

Started as a Designer crafting dealership sites and advertisements before transitioning into the Enterprise Solutions Specialist position where I became Google Certified in SEO and SEM, in addition to handling the markup and implementation of my own designs. During this time I wrote primarily on a proprietary PHP MVC platform, and on Wordpress for my freelance clients.

Front Door Solutions, LLC

Denver, CO
Development Consultant
Account Executive

May 2011 - July 2012

Managed and worked with the development team building our product in a .NET environment, as well as handling the logistics and execution of all Tier One and Two orders and interactions with an extremely high-touch communication process.

University of Colorado

Boulder, CO
Economics

October 2007 - May 2011

Graduated from the University of Colorado with a degree in economics. During this time I incorporated my freelance company (now doing business at davehin.es) doing work with a number of local businesses. I currently maintain 6 different Wordpress websites for freelance clients. At my peak I was maintaining 11 Wordpress sites with recurring monthly revenue for each.
